

The crude oil supply group of Flint Hills Resources Canada, LP builds upon 40 years of Koch companies' experience in Canada. The group combines a substantial physical market presence, advanced risk management expertise and superior financial strength to create value for its customers.

Based in Calgary, Alberta, Flint Hills Resources is among Canada's largest crude oil purchasers, shippers and exporters. To meet the needs of its more than 90 Canadian crude oil customers, the Supply Group operates a fully integrated marketing and customer service desk in Calgary and operates a crude oil terminal in Hardisty, Alberta. The group also coordinates crude oil supply for the company's Pine Bend Refinery in Minnesota.

Safety and Environmental Commitment

Flint Hills Resources is committed to operating in a manner that protects the health and safety of their employees, the public and the environment. The company strives for 100 percent compliance while meeting the expectations of the communities in which it operates.

Community Commitment

Flint Hills Resources is committed to understanding the community needs where it operates and to participating in projects and activities that add value to its neighbors and improve the quality of life in those areas. Recent community investments include support of Hardisty's fire department, minor sports and middle school academic awards as well as community events.

Background

Flint Hills Resources, LLC, through its subsidiaries, is a leading refining and chemicals company. It markets products such as gasoline, diesel, jet fuel, olefins, polymers and intermediate chemicals as well as base oils and asphalt. The company, based in Wichita, Kan., has expanded its operations through capital projects and acquisitions worth more than \$4.6 billion since 2002. With about 3,500 employees, Flint Hills Resources strives to create value for customers and society.

Flint Hills Resources refineries in Alaska, Minnesota and Texas produce a wide range of fuels that are transported through proprietary and common carrier pipeline systems, stored in a vast system of strategically located terminals and marketed to wholesalers and retailers throughout the United States. The company's chemicals business includes U.S. production facilities in Illinois, Michigan and Texas. These plants produce aromatics, olefins, polymers and intermediate chemicals. The company also owns an interest in a base oil facility in Louisiana.
